

On the Subject of Needy Wingdings

What in the world are these symbols and why are they on this bomb?  
Wait... are you telling me that's an actual font?!

To solve this needy module you'll have to figure out the displayed word and then press it from the list of available words.

Use the left and right arrows to cycle between different words, finally press the word itself to submit your answer.  
Here's a table to help you decode the message, good luck!

☞	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂	♂
a	b	c	d	e	f	g	h	i	j	k	l	m
■	□	▣	▤	▥	◆	♦	◆	◆	◆	⊠	⊡	⌘
n	o	p	q	r	s	t	u	v	w	x	y	z
✌	✎	👍	👉	👈	👉	👉	👉	👉	😊	😐	😞	💣
A	B	C	D	E	F	G	H	I	J	K	L	M
☠	🏠	🏠	✈	⚙	💧	❄	✚	✚	✚	✚	☆	☾
N	O	P	Q	R	S	T	U	V	W	X	Y	Z

## Example Tables

	
	Use <tr></tr> for rows. Use <th></th> or <td></td> for columns within rows (see below).
	Use <th></th>
	Use <td></td>
	Use rowspan="_" for merging cells vertically.
	Use colspan="_" for merging cells horizontally.
Note that merged cells created in other rows are skipped in affected rows (see HTML for above row).	

If the table contents are not wide enough, tables are centered by default due to the table rule of the first <style> block (see above code).

	Cell 2
	Cell 4

## Images

Use the  tag for images. Make sure to put your images into the /img/[Module Name]/ folder. Adjust the width with CSS, using width: \_%; (recommended) or width: \_px;. Example:

## Making the PDF

To make a PDF version of your manual, open the HTML file in Google Chrome and open the "Print" dialog (Usually CTRL+P) and choose "Save as PDF" as the destination.

## Appendix M: Additional Notes

Here other things to keep in mind when making a manual page:

- **There are comments `/* ... */` in the CSS code in the `<style>` blocks containing instructions. Follow those instructions before finishing your manual.**
- Normal and Needy module manual pages are formatted similarly. Widget manual pages are appendices and are formatted as such.
- Each manual or appendix page should have a `<div class="page-footer..."` at the bottom of the page, updated accordingly.
- Don't be afraid to ask for help if needed!
- A few things to reiterate:
  - Make sure to never forget closing tags (the ones with a `/` in them).
  - For the most part, HTML versions of bolding and underlining is recommended.
  - Italics are not used in vanilla manuals besides flavor text and references to appendices, and therefore is not included above.
